

RF Products Linecard

www.anatechelectronics.com

US manufacturer, offers the industry's largest portfolio of high-performance RF filters, and related products for Military, Commercial, Aerospace and Defense, and Industrial applications throughout the world. Many geared specifically to wireless communication, such as LTE, GSM, WCDMA, GPS, UMTS, WiFi, Cellular, etc. They offer a broad range of standard solutions and they can fulfill any customized requirement.

In addition to the filters, they offer power dividers, directional couplers, circulators, terminations, cable assemblies and antennas

www.johansondielectrics.com

US manufacturer offering a large variety of ceramic components from high volume, low cost capacitors to application specific ceramic solutions.

Their wide product offering includes the following Capacitors: Ceramic SMT and Leaded High Voltage and High Temperature, Y2 Safety Certified, Tip & Ring, Tanceram (for Tantalum replacement), Dual and Multi Capacitor Arrays, Low Inductance, X2Y, Switchmode.

The combination of a high-quality, extensive product offering and low lead times makes Johanson Dielectrics a world-class business partner.

www.johansontechnology.com

US manufacturer, global leader in High Frequency Ceramic Solutions for cellular, WLAN, Bluetooth, Zigbee, ISM, RF/Microwave, Millimeter Wave, Fiber Optic, and many other RF applications, as well as custom high frequency ceramic solutions.

They offer a broad range of Multi and Single Layer Capacitors, RF Inductors, LTCC based Chip Antennas, Baluns, Balanced Filters, Band Pass Filters, Low Pass Filters, Couplers, and Diplexers, as well as other components.

www.liconn.com

US manufacturer specialized in RF&Microwave products such as Amplifiers, Limiters, Attenuators, Calibration Kits, Filters, Terminations, Designer kits and much more. They are characterized by the excellent price/performance ratio, low volume customization possibility and fast delivery, typically from stock for low quantity.

www.microsemi.com

Global leader in RF & MW components, with a vast range of components and integrated solutions for Defense, Aerospace, Communication and Industrial markets, including: Diodes, Limiters, Switches, Attenuators, Transceivers, RF Transistors (bipolar, mosfet, GaN), integrated amplifiers up to 60GHz, customized solutions.

Dimac has been Microsemi representative in Italy for more than 20 years. Our extensive product and company knowledge is the best guarantee for our customers.

www.rfoptic.com

They are specialized in the design and manufacturing of RF over Fiber solutions. These products convert analog RF signals into optical signals transmitted over optical fibers and converted back to RF signals at various bands up to 20 GHz. Replacing thick coaxial cables or waveguides with optical fibers, designers can significantly reduce weight and infrastructure physical space in Marine, Airborne and Telecomm applications, whilst gaining cost effective communications with excellent performances. Another division is the Optical Delay Line product family, controllable externally via PC and suitable for testing and calibration purpose in a wide range of Radar, EW and Telecomm applications.

www.tdeitaly.com

Engineering company specialized in the design and manufacturing of RF amplifiers for Broadcasting, Military, Medical, Scientific and Industrial applications, up to 3GHz. Their large experience and the extreme flexibility of their technical team make TDE the ideal partner for the ones who are looking for the latest technology both for standard and customized solutions.
